

主题：1,261 - Vcom – Global Training Centre

Email 1,261: To all Delegates and Partners

Dear Members and Partners,

We would like to share with you the information provided by Vcom on their newly set up Global Training Centre below. If you have any questions please reach out to Jennifer Huang directly.

The Global Training Center (www.intskill.com), presented by Vcom, a Global Industry Partner of WorldSkills, is an online vocational education training platform supported by WorldSkills and developed and implemented in partnership with other Global Industry Partners. The platform is open to all technical skills practitioners globally and provides them with the latest training curriculum resources.

All the training courses related to the WorldSkills Competitions strictly follow the technical standards of WorldSkills and are free of charge to Members.

In addition, the platform also offers paid curriculum courses to schools and institutions which focus on the development of individual skills. Schools and institutions may also share their existing curriculum on the platform, so Members across the world can utilize their valuable resources.

The Global Training Center is planning to develop branches globally and is very open to discuss partnership opportunities with interested parties.

The platform is currently still under beta testing, and only a limited number of Member accounts can be given access to resources at this point in time.

If you are interested in registering for an account on the platform or learning more about Global Training Center (www.intskill.com) in general, please contact: Jennifer Huang secretary.office@china-vcom.com for any inquiries.

Best regards,

Semyon Nerodi-Grechka
Sponsorship and Partnership Manager
WorldSkills International
